

SERIOUS HEAD PROTECTION

COVER PLATE KIT

BR8 CARBON/BR8

! IMPORTANT.

Read this notice before placing the COVER PLATE KIT on your helmet!

COVER PLATE is design to seal the vents on the helmet and not allow airflow into the vents and prevent dirt and debris from entering the helmet.

The models BR8/BR8 Carbon offers five options to direct airflow to the driver based on their preference including: left side chin bar, right side chin bar, $\frac{3}{4}$ left side, $\frac{3}{4}$ right side, and top.

COVER PLATES are designed to seal off the vent locations depending on the configuration. When used with in a forced air configuration, the Cover Plates pressurize the helmet and prevent airflow from escaping from the open vent.

ATTENTION: COVER PLATE is compatible with all helmet sizes.

KIT CONTENTS:

Cover Plate (5pcs)

Forced Air and Cover Plate Seal (5pcs)

CORRECT POSITIONING

Before installing the Cover Plate, remove the protective cover from the back side of the Cover Plate exposing the adhesive material that will seal the Cover Plate to the helmet shell. Once installed press firmly around the edges of the Cover Plate to assure proper adhesion.

Place the Cover Plate in any of the 5 air inlets that you want to cover. Orient the Cover Plate in the same direction as the helmet recess to adjust it. Make the guide line mark align with the front edge of the rear hole (illustration 01).

Place the Forced Air and Cover Plate Seal on top of the Cover Plate to ensure a perfect seal and prevent air from entering.

! NOTE

Forced Air devices are designed to brake and/or to bend in case of impact. Do not reinforce or do not make more rigid. This accessory is applied with double sided adhesive. DO not permanently bond this accessory to the helmet. ONLY use this accessory with an authorized Bell auto racing helmet.
