

SERIOUS HEAD PROTECTION

FORCED AIR AND COVER PLATE SEAL KIT

**BR8 CARBON/BR8
HP6/GT6 CARBON/GT6**

! IMPORTANT.

Read this notice before placing the SEAL KIT on your helmet!

SEAL KIT allows a perfect sealing of the vents by installing the kit around the perimeter of the cover plates and the forced air inserts.

The models BR8/BR8 Carbon offers five options to direct airflow to the driver based on their preference including: left side chin bar, right side chin bar, $\frac{3}{4}$ left side, $\frac{3}{4}$ right side, and top.

The models HP6/GT6 Carbon/GT6 offers two options to direct airflow to the driver based on their preference including $\frac{3}{4}$ left side and $\frac{3}{4}$ right side.

The forced air inserts are universal parts that fit over the vent openings.

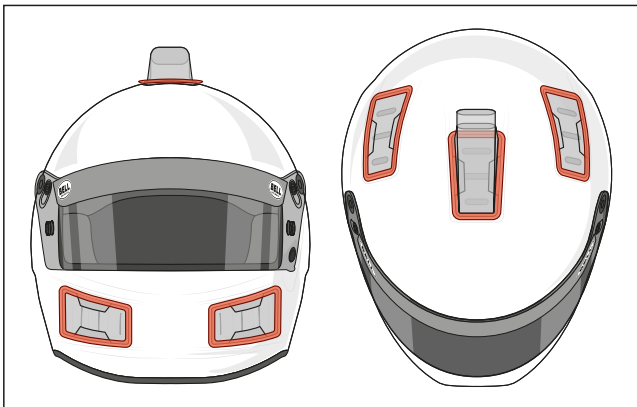

ATTENTION:

SEAL KIT is compatible with BR8 Carbon/BR8/P6/GT6 Carbon/GT6

KIT CONTENTS:

Forced Air and Cover Plate Seal (5pcs)

CORRECT POSITIONING

Place the Forced Air and Cover Plate Seals on top of the Forced Air inserts or on top of the Cover Plates to ensure a perfect seal and prevent air escaping or entering.

! NOTE

Forced Air devices are designed to brake and/or to bend in case of impact. Do not reinforce or do not make more rigid. This accessory is applied with double sided adhesive. DO not permanently bond this accessory to the helmet. ONLY use this accessory with an authorized Bell auto racing helmet.
